

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

## *JOURNAL OF MYCOLOGY*

*A Periodical Devoted to North American Mycology. Issued Bi-monthly; January, March, May, July, September and November Price, \$2.00 per Year. To Foreign Subscribers \$2.25. Edited and Published by*

*W. A. KELLERMAN, PH. D., COLUMBUS, OHIO.*

---

### NOTES.

It is a pleasure to record the fact that a Society of Mycologists was organized at St. Louis, during the recent meeting of the A. A. A. S. A full account of the organization has been furnished by the secretary, and is published in this number of the JOURNAL.

---

THE tender of the office of president of the Society to the eminent mycologist and President-elect of A. A. A. S., Dr. W. G. Farlow, elicited an expression of his hearty approval of the organization, though he was constrained to decline the honor because of pressing duties. Dr. Roland Thaxter was then made the presiding officer by a unanimous vote.

---

THE formation of a new scientific society when it has already been hinted that too many now are in existence, suggests the statement that perhaps unity of interest and purpose—as in case of this newly formed mycological society — should be the basis of all the organizations.

---

A READJUSTMENT of the numerous affiliated Societies and Sections of A. A. A. S., perhaps possible, surely desirable—may be, involving cleavage along new lines in some cases—ought to remove present friction and better subserve the interests of all.

---

IN connection with the matter it may be added, that it is perhaps too much to expect, or even to hope, that all mycological papers—whether detailing research work, or discussing phases of this branch of botany—may be read before this newly formed Mycological Club; in the latter at any rate the purely technical matters, and important topics such as bibliography and publication, nomenclature, group limits, etc., may be discussed to mutual advantage, and concerted action and uniform practice now and then induced.
